## OBJECTIVE

I am a budding software developer with strong passion for Artificial intelligence and the exploding world of Data science armed with the zest for challenges and an enthusiastic desire to learn, I wish to reach the topmost echelons of Artificial Intelligence teaming up with other professionals to plan, develop and execute sustainable solutions, which offers ample opportunities for organizational and individual growth.

## PERSONAL VALUES

I am a self-starter highly motivated with great decision-making abilities to deal with operating details. I am confident well organized and very hardworking skilled in listening explaining and consulting, ability to learn quickly, I perform excellently well in relationship management. I am a great team player and have the ability to motivate others to achieve a common goal.
